

Kelley Beekeeping

SERVING THE BEEKEEPER SINCE 1924

Swarm Trap

Give a swarming colony an ideal "home"! When used in conjunction with a swarm lure, swarming bees find the Swarm Traps irresistible. This trap is constructed of a fiber material that will hold up through many swarm seasons, mimicking the hollow of a tree, which is a favourite home of swarms.

Attach a 'Swarm Lure' to the lid of the trap and place your trap approximately 9ft - 12ft up in the air approximately 200 ft - 250 ft from the apiary.

Swarm Lure sold separately.
