

Zipper Instructions

Point A

To remove veil from coveralls, start unzipping the zipper from Point A. Take the pull all the way around to the other zipper pull. The pull **MUST BE** back to back (touching) before you may detach the veil.

Back to Back

To replace the veil, make sure the pulls are touching and apply them on **YOUR** left side. Once you have the pulls on, make sure your ends are straight across from each other, take the pull that went on first and zip it all the way back around to the right side.
